

Type-to-Type Functions

*when people say "but most business
logic bugs aren't type errors" i just
want to show them how to make bugs
into type errors*

— @mattoflambda

Order -> ReceiptProps

*Think of it as: "leaning on the compiler
so that one can turn runtime
problems into compiler errors, and
thus sleep peacefully at night".*

— Mikkel Christensen

Exercises

- Exercise 5a: Test drive the implementation of `orderToReceipt`
- Exercise 5b: Use `orderToReceipt` with the `Receipt` component to price and render orders in Storybook.
